EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gary Mangels on 09/13/2011.

The application has been amended as follows:

In the final paragraph of claim 25, delete "said composition having: (1) smooth impact resistance and/or notched impact resistance greater than compositions having the same composition except for the second additive B, or (2) lower viscosity than the compositions having the same composition except for the second additive B than compositions having the same composition except for the second additive B" and insert in its place " said composition having smooth impact resistance and/or notched impact resistance greater than compositions having the same composition except for the second additive B".

Delete claim 33.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the claimed invention shows unexpected results over the closest prior art.

Applicants claim a thermoplastic composition comprising a polyamide matrix and two additives including a first additive of a polycarboxylic acid and a second additive of a hyperbranched polyamide. Rhodianyl (FR 2 833 603 A1) discloses the polyamide matrix with an obvious variant of the hyperbranched polyamide additive while Takashima et al (US 6,319,575 B1) discloses the polyamide matrix with the polycarboxylic acid additive. However, Applicants have shown that the claimed genus of additives when used in combination results in a composition having much lower viscosity and only moderately reduced impact strength compared to the composition with no additives. This is unexpected since the polyamide matrix with only one of the two additives shows significantly reduced impact strength. See Table 2 in the specification. The unexpected results are commensurate in scope with the claimed composition because the claimed composition requires this inherent property to be present and the disclosed genus of each additive is narrowly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MIKE M. DOLLINGER whose telephone number is (571)270-5464. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone
